District App
By Superintendent Jim Wyse

By the time you read this article, the new Evergreen Local Schools District App will be ready for download. Please understand that when a new App is released, there are bound to be some glitches. Our Technology Coordinator, Tony Doble, has spent a considerable amount of time designing and working with our partner, SchoolMessenger, to get the Custom Mobile App off the ground floor. It looks great and works well – thanks Tony!

Why did we design a District Mobile App?
- To provide another means to communicate with our stakeholders. Our main stakeholders are students, parents, and staff members that have contact information in our Student Information System, which is PowerSchool.
- To broaden our ability to communicate with anyone interested in staying current with Evergreen Schools. Anyone with a smartphone or tablet can download our App. Once the App is downloaded, users should allow for push notifications so they can receive relevant information on their device.
- To make it faster and easier for anyone "on the go" to access information about our schools.

Where can I find the App?
- If you have an Apple phone or tablet, visit the App Store, search for "Evergreen Local School District" and download the App.
- If you have an Android phone or table, visit the Google Play Store, search for "Evergreen Local School District" and download the App.

Please Note:
- It is best to go through the setup process right after you download the App in order to choose the buildings or sports calendars you wish to follow. If you skip this important step, not all of the calendar information will appear. You will only see the District information. I suggest you choose all buildings and athletic events so everything appears for you on the App calendar.

We hope you are able to download the Evergreen App and you enjoy using it. If you know of someone that "bleeds green", please encourage him or her to download our new App.
